

WHAT are the differences in behaviour between the low and the high education group, and how do the indicators of that behaviour evolve after targeted interventions?

 Belgium

Indicators of the gap in health-related behaviours between low and high socio-economic groups.		
 Drinks	Baseline 	
	Impact 	
 Physical activity	Baseline 	Sustainability:  Belgian low education kids sustainably reduced their TV time, thus reducing the gap with children of high-socio-economic status
	Impact 	

 Bulgaria
