

WHY

is there a difference in behaviour between the low and the high education group, and how do these determinants of the social and physical environment of the child evolve after targeted interventions?

 Belgium

Determinants of the inequity gap per behaviour.			
	Baseline	Impact: evolution	Sustainability
 Dietary intake	Fruit consumption <ul style="list-style-type: none"> • Availability of fruit at home 		
 Fluid intake	Fruit juices consumption <ul style="list-style-type: none"> • Parental allowing for consuming fruit juices 	↓	
 Screen exposure	TV exposure <ul style="list-style-type: none"> • TV available in child's bedroom • Having TV on during mealtime • Monitoring the time the child watches • TV Parents watching TV together with the child 	↑	✓ monitoring child's TV exposure
	PC exposure <ul style="list-style-type: none"> • Child nagging when computer playing is forbidden • Parents playing computer games/using computer together with the child 		

		Determinants of the inequity gap per behaviour.		
		Baseline	Impact: evolution	Sustainability
 <p>Dietary intake</p>	<p>Fruit consumption</p> <ul style="list-style-type: none"> • Allowing fruit consumption 			
	<p>Soft drinks consumption</p> <ul style="list-style-type: none"> • Availability of softdrinks at home 			
 <p>Fluid intake</p>	<p>TV exposure</p> <ul style="list-style-type: none"> • TV available in child's bedroom
